17 South Charles St., Baltimore.

Brooks Wharf, Upper Thames St., London.

WROUGHT STEEL DOOR LOCKS.

In presenting this pamphlet, illustrating the development of our new and important departure in the manufacture of Door Locks from WROUGHT STEEL, we call the attention of all dealers, architects, and builders, to their many advantages.

The goods excel in lightness and strength, in beauty of design, and novelty of finish; and being made from wrought metal, are uniform in size and exact in measurement.

Attention is also called to the strikes for rim locks, as shown in illustrations, the improvement in which is the added security of a flange extending over the door-casing, through which a screw is fastened at right angles with the usual screws, preventing the possibility of its being forced or taken off when the door is locked.

By the use of perfected methods, for which we own letters patent, we are enabled to supply these goods made from WROUGHT STEEL in competition with those made from cast iron.

Respectfully,

Russell & Erwin Manf'g Co.,

SOLE MANUFACTURERS.

NEW BRITAIN, CONN., U. S. A.

January, 1891.
